

# SOLAR ELECTRICITY

PHOTOVOLTAIC SYSTEMS

## Does your solar specialist tick all the boxes? See how we stack up...

- ✓ Over three decades of combined solar PV experience
- ✓ Team members trained by leading industry experts (SolarWorld, Victron, PVSol, RENAC, SMA, Solarteur)
- ✓ All projects are managed by dedicated project managers with over 25 years of experience in managing multi million rand projects
- ✓ Every system designed by a qualified electrical engineer specialising in solar electrical systems
- ✓ Every system is installed and signed off by a registered Master Electrician
- ✓ System performance is simulated using leading international modelling software
- ✓ Exclusive use of best of breed equipment with bankable track records
- ✓ Project feasibility calculated by qualified financial professionals
- ✓ Verifiable track record of 356 kWp installed capacity and 4.8 MWp designed capacity, encompassing:
  - Off Grid Systems (AC & DC)
  - Water pumping solutions
  - 3 phase mini grid solutions
  - Micro Wind generation
  - PV / Diesel hybrid solutions
  - PV / Wind hybrid solutions
  - Leisure craft power solutions
  - Commercial and Domestic Grid tied solutions
  - Utility scale solar park design and development
  - Storage solutions using lead-acid and lithium technology
